Increase in Contractor and Employee Safety

Our system gives customers the ability to view all work and permit activity (including all approved, awaiting approval, closed, cancelled, and rejected permits) taking place on-site. The system also highlights any potential work conflicts, eradicating them before they become an issue.

Increase
in Contractor and
Employee Safety

Certainty of Compliance

Our system gives customers peace of mind that everyone on-site is compliant and working safely by ensuring permits are raised in accordance with site policies and that unqualified contractors are automatically identified and unable to access the site.

The site map and our many reports allow our customers to see the big picture of what activities are happening on-site. This, combined with the auto-notifications that are sent to internal stakeholders regarding permit activity, mean that customers can reduce the amount of time they otherwise would have spent trying to make sure everyone is aware of work happening on-site.
